

# Bring us your bill. Save 50% or more.

Every lead and every call, from the form to the signed document, on one stack. Each piece works on its own or together, and each one connects to your dialer and CRM by API and webhooks.

|          |                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                               |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1</b> | <b>KAPTURE · THE LEAD COMES IN</b><br><b>Record the form and the consent</b><br>A pixel on your form, or a form we build. Every lead is recorded with full replay and the exact consent wording the person agreed to, word for word. Tamper-proof.                                                                                          | <b>\$0.001</b> per lead recording<br>With your own connected storage.<br><b>2,000 free tokens. New accounts, no card.</b>                     |
| <b>2</b> | <b>KONTROLX · CHECK AND ROUTE THE LEAD</b><br><b>Bad leads stop before they cost you</b><br>Each lead is checked before you pay for it or dial it: repeats, missing details, a real phone number, proof of consent. Pre-ping asks your buyers first. Look-ups run on your own data accounts, at their price.                                | <b>50% off</b> your current lead software bill<br>Base rate starts at \$2,500 a month.                                                        |
| <b>3</b> | <b>KURRENT · THE CALL COMES IN</b><br><b>Check every call before the phone rings</b><br>Banned numbers never ring. Junk and fake calls are checked with your own services. Each call goes to the right center, team or buyer, with recording and transcripts. Runs on your own phone company account, so minutes are billed at their price. | <b>50% off</b> your current call tracking bill<br>Minimum \$1,795 a month.                                                                    |
| <b>4</b> | <b>KOMMS · AI ANSWERS AND CALLS BACK</b><br><b>AI voice agents for inbound and outbound</b><br>After hours, overflow, speed-to-lead callbacks and qualifying calls. Callers can always ask for a person and get transferred to your agents. Komms reduces talk time 30–40% vs. your agents on the same script.                              | <b>\$0.08</b> a minute, phone call included<br>Billed every 6 seconds. \$15/mo per number.<br><b>625 free minutes. New accounts, no card.</b> |
| <b>5</b> | <b>KAPTURE · CLOSE IT</b><br><b>Sign the documents</b><br>Send agreements for e-signature with no per-seat fees. Every signing is recorded, so you can replay exactly what the signer saw.                                                                                                                                                  | <b>\$15/mo</b> unlimited e-sign<br>With your own connected storage.                                                                           |

**Paying more per minute for voice AI today?** Show us what you pay per minute, the phone call, the AI and the voice all added up. We'll beat it.

Compared all in, per minute, against your current bill. Custom quote.

**Every plan, every feature.** API and webhooks on every product

Your phone numbers, recordings and data stay in your accounts
